Robotic Tooling

Creating Innovative Tooling for Gripping and Transporting

BILSING AUTOMATION is a leading supplier of industrial tooling solutions, specialized in robotic tooling and material handling systems.

We have over 30 years' experience in the automotive stamping and body shop, as well as developing material handling solutions for injection molding, fabrication, packaging, hydroforming and non-automotive applications.

Our tooling is based upon an innovative modular system, which provides the flexibility to rapidly configure customized solutions from our array of standard components.

We offer automated pressroom solutions for robotic press-to-press transfer, linear transfer, tri-axis transfer presses and crossbar transfer presses.

Our long-term experience and constant innovation management help us to efficiently develop affordable customized solutions.

BILSING AUTOMATION has a worldwide network of subsidiaries and resellers located throughout Europe, the USA, Asia and the Pacific Rim. This ensures that our components and modular systems are available anywhere and at any time to ensure high productivity for our customers.
