Plastics. Our Profession.

Since 1949 the family-owned company of Pöppelmann, with its five production sites and 600 injection moulding machines, thermoforming lines and extruders, has grown into a leading manufacturer in the plastics processing industry. In more than 90 countries people value the quality we offer, "made by Pöppelmann".

Today, the company is divided into four divisions. Located in Kunshan, China, we are present in the Chinese market primarily with our KAPSTO® and K-TECH® from 2018.

Our KAPSTO® protective caps and plugs ensure optimum protection during production, storage and transport. Every protection element of our KAPSTO® standard program with over 3,000 versions perfectly protects your application. – All individually tailored according to your requirements. Whether robust, low-abrasion, temperature resistant or sealing – you will find the right protective element here.

From project support and development right through to Mould Making and serial production: Pöppelmann K-TECH® is your partner for high-precision plastic injection-moulded technical parts, from development to serial production. We also take over all those numerous little jobs which a project involves. As our customer you will therefore save plenty of time and the costly doubling up of work – for economical and perfectly functioning solutions.

In the future, Pöppelmann China will continue to provide high-precision technical injection moulded parts to our customers.
